2.3. Additional or new data has been obtained in connection with the Oswego common source of supply sufficient to show a substantial change in conditions or change in knowledge of conditions existing in connection with such common source of supply underlying said Section 9 in that it now appears that the Burton 9-18-6 3HC Well will not and cannot effectively and efficiently drain all of the primarily recoverable hydrocarbons in such common source of supply underlying such section. Therefore, two additional wells are necessary for the Oswego common source of supply underlying said Section 9 so as to produce hydrocarbons therefrom.

2.4. In order to protect correlative rights, obtain the greatest ultimate recovery of oil and gas and prevent the various types of waste, the Commission should authorize and permit two additional wells for the production of hydrocarbons from the Oswego common source of supply underlying Section 9, and establish proper allowables for such well and unit.

3. Legal Authority: The relief sought by this application is authorized by Tit. 52, Okla. Stat., Section 87.1.
